

Environmental Philosophy Questionnaire

This is a study on environmental ethics, more specifically, on the personal philosophies of environmentally conscious Olin students (especially those who consider themselves environmentalists). Participation in this study will be essential to the completion of Emily Shackleton's AHS Capstone Project, which aims to analyze student perspectives on the environment and environmentalism.

Participants will receive no benefits from this study and will not be paid or reimbursed for the time it takes to complete this survey. We hope that taking the survey will be a fun and interesting experience for participants.

Each participant may choose to provide her/his name for possible follow-up questions. In any written work, participants' identities will be changed so that participants cannot be identified.

This survey should take approximately 10-15 minutes, however participants may choose to discontinue at any time.

Environmental Identity

(Page 3 of 11)

2. **Which of the following best describes your identity in relation to the environment?**

Mark only one oval.

- Environmentally Aware: I value environmental conservation, but it is not a priority for me.
- Environmentally Concerned: I value environmental conservation, and I try to be environmentally conscious when it's convenient.
- Environmental Proponent: Conservation is important to me, and I try to make environmentally conscious decisions on a daily basis.
- Environmental Advocate: Conservation is a priority for me, and I regularly shape my decisions/actions around my value for the environment.
- Environmental Activist: Conservation is a huge priority to me, and a big part of my life and identity, and I speak openly to others about my values and beliefs as an environmentalist.

Being an Environmentalist

(Page 7 of 11)

According to the Oxford Dictionary, an environmentalist is "a person who is concerned with or advocates the protection of the environment". For this survey, the phrases "environmentalism" or "environmentalist" are meant to reflect this broad definition of the term.

Environmental Beliefs

(Page 9 of 11)

14. **For each of the following statements about the relationship between humans and the environment, please indicate the extent to which you agree or disagree, using the scale.**

Mark only one oval per row.

	Strongly Agree	Agree	Neither Agree Nor Disagree	Disagree	Strongly Disagree
We are approaching the limit of the number of people the earth can support	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Humans have the right to modify the natural environment to suit their needs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
When humans interfere with nature it often produces disastrous consequences	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Human ingenuity will ensure that we do NOT make the earth unlivable	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Humans are severely abusing the environment	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The earth has plenty of natural resources if we just learn how to develop them	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Plants and animals have as much right as humans to exist	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The balance of nature is strong enough to cope with the impacts of modern industrial nations	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Despite our special abilities humans are still subject to the laws of nature	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The so-called "ecological crisis" facing humankind has been greatly exaggerated	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The earth is like a spaceship with very limited room and resources	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Humans were meant to rule over the rest of nature	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The balance of nature is very delicate and easily upset	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Humans will eventually learn enough about how nature works to be able to control it	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
If things continue on their present course, we will soon experience a major ecological catastrophe	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
